Permalink Settings

WordPress offers you the ability to create a custom URL structure for your permalinks and archives. Custom URL structures can improve the aesthetics, usability, and forward-compatibility of your site. Here are some examples to get you started.

Common Settings

- Plain `https://wpmv.com.my/?p=123`
- Day and name `https://wpmv.com.my/2021/01/20/sample-post/`
- Month and name `https://wpmv.com.my/2021/01/sample-post/`
- Numeric `https://wpmv.com.my/archives/123`
- Post name `https://wpmv.com.my/sample-post/`

Custom Structure `https://wpmv.com.my`

Free plugin [Disable Comments](#) to disable comments

WordPress General

The screenshot shows the WordPress admin dashboard with the 'Settings' menu item highlighted in the left sidebar. The main content area is titled 'Disable Comments' and has two tabs: 'DISABLE COMMENTS' (active) and 'DELETE COMMENTS'. Under the 'Settings' heading, there is a sub-heading 'Configure the settings below to disable comments globally or on specific types of posts.' The first setting is 'Everywhere: Disable comments globally on your entire website', which is selected with a radio button. A warning message below it states: 'Warnings: This will disable comments from every page and post on your website. Use this setting if you do not want to show comments anywhere.' The second setting is 'On Specific Post Types:', which is unselected. It has three checkboxes: 'Posts' (checked), 'Pages' (checked), and 'Media' (checked). A note below it states: 'Note: Disabling comments will also disable trackbacks and pingbacks. All comment-related fields will also be hidden from the edit/quick-edit screens of the affected posts. These settings cannot be overridden for individual posts. Comments will be visible on all other post types.' Below these settings is a section titled 'Disable Comments With API' with the sub-heading 'You can disable comments made on your website using WordPress specifications.' It contains two toggle switches, both of which are turned 'ON': 'Disable Comments via XML-RPC' and 'Disable Comments via REST API'. A note below these toggles states: 'Turning on these settings will disable any comments made on your website via XML-RPC or REST API specifications.' At the bottom of the page is a green 'Save Changes' button.

DISABLE COMMENTS DELETE COMMENTS

Settings

Configure the settings below to disable comments globally or on specific types of posts.

Everywhere: Disable comments globally on your entire website

Warnings: This will disable comments from every page and post on your website. Use this setting if you do not want to show comments anywhere.

On Specific Post Types:

Posts Pages Media

Note: Disabling comments will also disable trackbacks and pingbacks. All comment-related fields will also be hidden from the edit/quick-edit screens of the affected posts. These settings cannot be overridden for individual posts. Comments will be visible on all other post types.

Disable Comments With API

You can disable comments made on your website using WordPress specifications.

Disable Comments via XML-RPC

Disable Comments via REST API

Turning on these settings will disable any comments made on your website via XML-RPC or REST API specifications.

[How to Speed Optimize WordPress](#)

Speed Optimization

The screenshot shows the GTmetrix website header with navigation links: Features, Pricing, Resources, Blog, and a Welcome message. The main content area displays a 'Latest Performance Report for: https://wpmy.com.my/'. The report was generated on Wednesday, January 20, 2021, at 12:02 PM +0800. The test server location is Hong Kong, China, and the tools used are Chrome (Desktop) 86.0.4240.193 and Lighthouse 6.3.0. The performance summary shows a GTmetrix Grade of 'A', with Performance at 100% and Structure at 98%. Web Vitals are also shown: Largest Contentful Paint at 441ms, Total Blocking Time at 0ms, and Cumulative Layout Shift at 0.

The screenshot shows the PageSpeed Insights interface. At the top, there are links for 'PageSpeed Insights', 'HOME', and 'DOCS'. A search bar contains the URL 'https://wpmy.com.my/' and an 'ANALYZE' button. Below the search bar, there are tabs for 'MOBILE' and 'DESKTOP'. The main performance score is displayed as a large green circle with the number '97'. Below the score, the URL 'https://wpmy.com.my/' is shown, along with a legend for score ranges: 0-49 (red), 50-89 (orange), and 90-100 (green).

Field Data — The Chrome User Experience Report does not have sufficient real-world speed data for this page.

Origin Summary — The Chrome User Experience Report does not have sufficient real-world speed data for this origin.

Lab Data

● First Contentful Paint	1.7 s	● Time to Interactive	1.7 s
● Speed Index	2.0 s	● Total Blocking Time	20 ms
■ Largest Contentful Paint	2.6 s	● Cumulative Layout Shift	0

Speed Optimization

Latest Performance Report for: <https://ulement.com/>

Report generated: Wed, Jan 20, 2021 12:53 PM +0800
Test Server Location: 🇭🇰 Hong Kong, China
Using: 🌐 Chrome (Desktop) 86.0.4240.193, Lighthouse 6.3.0

GTmetrix Grade ?

A	Performance ? 100%	Structure ? 100%
----------	------------------------------	----------------------------

Web Vitals ?

Largest Contentful Paint ? 449ms	Total Blocking Time ? 15ms	Cumulative Layout Shift ? 0
--	--------------------------------------	---------------------------------------

Field Data — The Chrome User Experience Report does not have sufficient real-world speed data for this page.

Origin Summary — The Chrome User Experience Report does not have sufficient real-world speed data for this origin.

Lab Data

● First Contentful Paint	1.2 s	● Time to Interactive	2.5 s
● Speed Index	1.2 s	● Total Blocking Time	30 ms
● Largest Contentful Paint	1.2 s	● Cumulative Layout Shift	0

Values are estimated and may vary. The performance score is calculated directly from these metrics. See calculator.

 **You** · 12:21 pm (less than a minute ago)
Installed plugin "Simple History"

Description: Plugin that logs various things that occur in WordPress and then presents those events in a very nice GUI.
Version: 2.38.0
Author: Pär Thernström
URL: <https://simple-history.com>

 **WordPress** · 12:21 pm (less than a minute ago)
Welcome to Simple History! This is the main history feed. It will contain events that this plugin has logged.

 **WordPress** · 12:21 pm (less than a minute ago)
Because Simple History was only recently installed, this feed does not display many events yet. As long as the plugin remains activated you will soon see detailed information about page edits, plugin updates, users logging in, and much more.

WordPress Management

Website is like your house, you must have the responsibility to manage and protect yourself.

My golden rules is paid what what you need to use, don't use nulled; always up to date and always self backup.

Thank you
